

Project Mukti

(मुक्ति — *Liberation*)

The Under-trial Legal Lifeline

An AI-powered bail application system giving families the legal map they need to set their loved ones free.

“

My brother has been in prison for 11 months. He was never convicted. We don't know what to do.

— Family of an under-trial prisoner, Rajasthan

THE PROBLEM

75%

of India's prisoners
are under-trials

550K+

people awaiting
trial right now

∞

families with no legal
guidance or support

Why Do People Rot in Jail?

It's not always guilt. It's often ignorance of the law, buried paperwork, and no one in their corner.

Don't Know They're Eligible

Families are unaware that their loved one qualifies for bail under BNSS Section 479 or Section 436.

Buried in Paperwork

Charge sheets can run 500+ pages. FIRs are handwritten. No one reads them end-to-end.

No Affordable Lawyer

Legal aid exists but is underfunded and overwhelmed. Families show up with nothing.

Missed Hearings

Families miss court dates because they don't know when they are. The case stalls for months.

What Project Mukti Does

We don't replace lawyers. We make sure families can walk into a legal aid clinic with the right document.

01

Upload FIR

Family scans the handwritten FIR. AI Vision digitizes it instantly.

02

AI Analysis

Claude reads the charge sheet against BNSS law to find bail eligibility.

03

Bail Application

A ready-to-file 3-page bail application is generated with exact legal sections cited.

04

Legal Aid Clinic

Family walks in with a document. Advocate reviews and files. Hearing gets scheduled.

How It's Built

Long Context AI

Claude reads entire charge sheets (100-500 pages) + full BNSS law in one pass

Vision / OCR

Handwritten FIRs digitized via Claude Vision — no scanner required

RAG – BNSS 2023

Bharatiya Nagarik Suraksha Sanhita indexed as vector DB; replaces the old CrPC

Deterministic Scoring

Bail confidence score is rule-based (days in custody, offence type) + AI explanation

Multilingual Output

Applications generated in Hindi, Marathi, Bengali — not just English

Core API

› **claude-sonnet-4-5**

› Vision (FIR OCR)

› Tools / Function Calling

› eCourts API (CNR lookup)

› Twilio SMS reminders

› FastAPI + React frontend

Features That Matter

Ready-to-File Bail Application

3-page draft citing exact BNSS sections, automatically formatted for a court filing.

Regional Language Output

Documents in Hindi, Marathi, Bengali — accessible to the actual families who need them.

Hearing Date Reminders

WhatsApp/SMS alerts via Twilio so families never miss a court date again.

Human-in-the-Loop Approval

An advocate or paralegal must click Approve before any document is finalized. AI assists, humans decide.

eCourts Case Tracking

Enter the CNR number and fetch live case status directly from the eCourts portal.

Privacy-First Architecture

Demo uses anonymised data. Production runs on-premise. No real prisoner data goes to third-party APIs.

What Could Go Wrong — And What We Did About It

AI Hallucination

Output explicitly states: 'Section 479 BNSS appears applicable based on the charge sheet. A licensed advocate must confirm and file.' We give families a map — not a verdict.

Replacing Lawyers

The 'Approve' button is mandatory. The AI generates a draft; the advocate reviews, amends, and files. We expand access, not circumvent expertise.

Wrong Legal Section

We index BNSS 2023 (not outdated CrPC). Confidence score is deterministic: days in custody + offence type + charge-filing delay. No AI guesswork.

Data Privacy

Hackathon demo uses synthetic/anonymised FIRs. Production design: on-premise deployment. No real prisoner data ever reaches a third-party server.

The Team Behind Mukti

1

AI Pipeline Lead

- FIR digitisation via Vision
- BNSS long-context analysis
- Bail section identification
- Confidence score logic

2

Backend Engineer

- FastAPI /process-case endpoint
- eCourts CNR integration
- Case status tracker
- Twilio SMS/WhatsApp reminders

3

Frontend Developer

- Upload + manual FIR form
- Bail application preview UI
- Multilingual output toggle
- Human-in-the-loop Approve flow

4

RAG & Legal Specialist

- BNSS 2023 vector indexing
- Section reference accuracy audit
- Section 479 / 436 mapping
- Legal disclaimer language

5

Ethics & Presentation

- Adversarial edge-case testing
- Hallucination mitigation review
- Demo script and pitch deck
- Rubric alignment & storytelling

Who Benefits — And How Far It Can Reach

Families

Walk into legal aid with a prepared document instead of nothing

Legal Aid Advocates

Receive pre-identified bail arguments — spend time filing, not searching

Under-trials

Every day saved is a day of freedom — for someone who hasn't even been convicted

Other Countries

Swap the RAG PDF for Pakistan's CrPC or Bangladesh's law — new market in a day

Scaling is one line of code:

Swap the BNSS PDF in the RAG database for Pakistan's CrPC, Bangladesh's penal code, or Kenya's Criminal Procedure Act. Same system. New country.

Justice shouldn't depend on whether you can afford a lawyer.

Project Mukti gives every family the same starting point:
the right document, the right legal argument, in the right language.

We don't decide. We empower.
